

ALEJANDRO GONZÁLEZ LÓPEZ

Angular Frontend Engineer | Angular 17-21 · TypeScript · RxJS · Signals · NgRx

AlejandroGL92_IT@outlook.es | +34 698 928 198 | alejandrogl.is-a.dev | LinkedIn | GitHub
Spain / EU · Immediate availability · Remote, hybrid or on-site · Open to relocation

PROFESSIONAL PROFILE

Angular Frontend Engineer specialised in modern Angular, TypeScript, RxJS, Signals and NgRx, with hands-on experience building and operating real client and startup products. Strong focus on frontend architecture, reactive state, SSR and hydration, performance, accessibility and technical SEO. Complementary experience with NestJS, GraphQL, PostgreSQL, Docker and AWS supports effective end-to-end delivery while keeping frontend engineering as the primary specialisation.

CORE SKILLS

Frontend:	Angular 17-21, TypeScript, JavaScript, RxJS, Signals, NgRx SignalStore, Astro, Tailwind CSS, HTML5, CSS3.
Architecture & quality:	Standalone Components, SSR/hydration, state management, feature-based architecture, Vitest, Jest, Supertest, Angular Testing Library, WCAG, Core Web Vitals.
Data & integration:	GraphQL, Apollo Client, REST APIs, OAuth 2.0, RBAC, NestJS, PostgreSQL, Prisma.
Cloud & delivery:	Docker, AWS EC2/S3, Railway, Vercel, Terraform, Bunny.net, HLS, TUS.

PROFESSIONAL EXPERIENCE

Angular Frontend Engineer - Finca El Sarao

May 2026 - Present

Client project · Sole developer

- Building the replacement digital platform for the client's previous website, owning the project from MVP definition through architecture, implementation, deployment and launch validation.
- Built a zoneless Angular 21 frontend and NestJS/PostgreSQL backend, including authentication, RBAC, course catalogue, enrolments, student campus and administration flows.
- Implemented an LMS video pipeline with TUS uploads, HLS playback via hls.js, signed URLs, JWT access control and Bunny.net delivery.
- Designed the hybrid rendering and technical SEO strategy across prerender, SSR and CSR routes, including metadata, canonical URLs, JSON-LD, sitemap management and Search Console.
- Work directly with the client on product, business, marketing and SEO decisions, with incremental deliveries and MVP evolution according to their priorities.

Angular Frontend Engineer - GTVMOTOR

Dec 2024 - Present

Independent client project · Sole developer

- Own the automotive web platform end to end, translating client requirements into architecture, frontend, backend, data model, deployment, testing and production maintenance.
- Modernised an Angular 17 legacy template into a Standalone, feature-oriented architecture and built reactive flows with RxJS and Signals.
- Designed backend and persistence with NestJS, Bun, PostgreSQL and Prisma; integrated Stripe, Amazon SES and secure S3 access, including 19 notification and payment triggers.
- Implemented Angular SSR manually after the standard integration failed, resolving browser/server boundaries, NG0506 hydration and NgZone stability issues, APP_INITIALIZER behaviour, SEO metadata and LCP optimisation.
- Deployed and operated the platform on AWS EC2 with Docker/Nginx/PostgreSQL; deployed to a production environment since February 2026.

PROFESSIONAL EXPERIENCE (CONTINUED)

Angular Frontend Engineer & Co-Founder - Slowork

Jan 2024 - Present

Incorporated startup · Multidisciplinary team (~15 people)

- Co-founded the startup and own the frontend stream in coordination with the backend/API developer, contributing within a multidisciplinary product, marketing, legal and social-media team.
- Developed the Angular application including OAuth 2.0 authentication, booking/calendar flows, notifications, Creator Panel, access control and GraphQL/Apollo integrations.
- Built the original public landing in React and later migrated the web ecosystem to Astro; led major technical SEO, content architecture and blog/API integration work.
- Optimised selected landing pages to 100/100 Lighthouse scores and improved Core Web Vitals; work is coordinated through ClickUp, Kanban and separate GitHub repositories.
- The MVP currently has real users within the content-creator workflow.

PREVIOUS EXPERIENCE

Cloud Infrastructure Engineer - Emergya

Mar 2022 - Jun 2022

Professional employment · Seville, Spain

- Automated AWS infrastructure using Terraform and Docker, applying Infrastructure as Code practices to production-oriented environments.

QA Automation Tester - MTP - Métodos y Tecnología

Jul 2021 - Mar 2022

Professional employment · Seville, Spain

- Developed and maintained automated test cycles for Endesa with HP UFT and VB, focusing on functional stability, regression control and issue tracking.

SELECTED ENGINEERING HIGHLIGHTS

- Angular SSR/hydration: manually assembled server bootstrap with CommonEngine and resolved browser-only APIs, APP_INITIALIZER side effects, NG0506 stability issues, Google Analytics/timer interactions with NgZone, SSR-safe canonical/OG metadata and JSON-LD.
- Angular state architecture: diagnosed circular dependencies across SignalStore, Apollo and services and decoupled the flow through lazy dependency resolution with Injector.
- Production delivery: hands-on experience operating Angular/NestJS applications across AWS, Railway, Vercel and Bunny.net, with PostgreSQL, Docker, signed media access and hybrid rendering.

EDUCATION

Advanced Professional Program in Full-Stack Web Development - Conquer Blocks

Feb 2025 - Present

Private professional training in software engineering fundamentals, Clean Code, SOLID, architecture and end-to-end web development.

Full Stack Web Development Bootcamp - Upgrade Hub

Dec 2022 - Feb 2023

Intensive practical training in modern web application development and Agile methodologies.

Higher Technician in Network Computer Systems Administration (ASIR) - IES Lucus Solis

Sep 2014 - Jun 2017

Advanced vocational training in systems administration, networking, databases, security and application deployment.

LANGUAGES & ADDITIONAL TRAINING

Languages: Spanish - Native · English - Advanced / Professional working proficiency · French - Elementary.

Additional training: Microsoft Azure Cloud Systems Administrator - EOI (Feb-Jun 2021) · Python Programming - Universidad San Jorge (2020-2021).
